REDEFINING SUSTAINABILITY

A sustainable lifestyle begins at home. BillionBricks' award-winning modern house designs come with an integrated solar roofing system that generates clean and renewable energy to power the home. When combined together, these homes form a community with a utility scale solar farm.

BillionBricks is a pioneering climate-tech venture, creating the world's first carbon-negative solar home community.

Begin your net zero journey with homes by BillionBricks.

Net-Zero Home Specifications

30 to 43 square meters of built-up area

Roofing system with integrated solar

10kw of solar generation capacity

Designed to resist earthquakes and typhoons
